Claims 1 and 3-8

The subject matters of claims 1 and 3-8 are not described in any of the documents cited in the ISR. Furthermore, a person skilled in the art could not have easily conceived of letting a biodegradable polymeric material selected from glycosaminoglycan, collagen and their composite contain calcium phosphate with a concentration gradient.

So, the subject matters of claims 1 and 3-8 appear to be novel and to involve an inventive step in view of documents cited in the ISR.
